

Kyle Liebler

Miami, FL
954-536-0075

liebler@umich.edu
liebler.xyz

MS Student | University of Michigan

Master's student in electrical and computer engineering concentrating in computer vision.
Graduating in Dec. 2022 and seeking opportunities in software engineering or related roles.

Skills

C++
Docker
Integration Testing

Python
Microservices
Linux & Shell Scripting

Java
Matlab
Backend System Design

Experience

SOFTWARE ENGINEER (Intern) **Cisco**, San Francisco, CA (Remote)

May – Aug 2020, 2021, & 2022

- Worked on Webex Assistant (a conversational AI voice assistant) and Webex (a collaboration solution).
- Contributed to Message Highlights, a prioritized message service, utilizing tools such as Apache Kafka.
- Assisted in developing a large scale back-end system with a multitude of databases and microservices in charge of storing and processing all user and organization data for Webex Assistant.
- Developed a multi-stage integration testing framework relying on Docker and Pytest to increase focus on specific pairs and triplets of services as well as evaluating the whole system.
- Created an automatic OpenAPI 3.0 documentation generator with Jenkins Pipeline code running on hundreds of internal Webex repositories. Also built a self-updating webpage to host the documentation.
- Received 1st place in an internal hackathon revolving around adding new skills to the assistant. Utilized MindMeld (a Cisco acquired conversational AI machine learning framework), and IFTTT (a platform for controlling IoT devices) to create a touchless office experience for users in the wake of COVID-19.

DEVOPS ENGINEER (Intern) **DataHub**, Chicago, IL (Remote)

Nov 2019 – Aug 2020

- Certified for Red Hat Enterprise Linux 7 and OpenShift 4. Role involves integrating customers' workflow to hybrid cloud infrastructure with OpenShift (a Kubernetes centered unified DevOps platform).

RESEARCHER

RHE Lab U-M, Ann Arbor, MI

Sep 2019 – Present

- Role involves software development using Wi-Fi signals in order to simulate ionized radiation sources and map using proprietary algorithms. Mobile application programming in Flutter (Dart). Android specific development done in Java. Algorithms implemented in Matlab and Python.

SOFTWARE ENGINEER (Intern) **Entrepidus**, Miami, FL

Jun – Aug 2017

- Tasked with creating a full-stack client data analysis system using HTML5, CSS3, JavaScript, Node.js, and MySQL to interact with Atlassian JIRA's RESTful services.

MISSIONARY

Casa Hogar, Mexico

Restoration Atl, Atlanta, GA

Jun 2015 – July 2018

- Cared for orphans and participated in construction projects at Casa Hogar Orphanage in Mexico.
- Cooked, cleaned, counseled, and provided shelter for battered women and children in the Atlanta area.

Publications & Presentations

Radiation Source Localization

Jul 2021

Comparison of Common Methods for Single Detector Radiation Source Localization. Presented at Health Physics Society, July 2021.

Navigational Path Generation

Jun 2021

Simulations and Experimental Verifications of an Algorithm for Radiation Source Mapping and Navigational Path Generation. Published in Health Physics Journal, June 2021.

Radiation Simulation

Mar 2020

Radiation Simulation using Wi-Fi Signal Strength and Frequency. Presented at WM Symposia 2020.

Education

Master of Science

University of Michigan

Concentration in computer vision. Expected graduation in December of 2022.

Class of 2022

Bachelor of Science in Engineering

University of Michigan

Studied electrical engineering with a concentration in computer science.

Class of 2021

Associate of Arts

Broward College

Participated in a full-time dual enrollment program during high school where all courses were taken at Broward College and received an AA degree with a 4.0 GPA.

Class of 2018
